<b>Fellowship Overview (300 words)</b>	This is a hand on, 1 year clinical fellowship designed for 1-2 candidates. The fellow will be exposed to a very large volume of diverse implant surgeries. He will be taught, and will feel very comfortable, doing established and new techniques to achieve surgical perfection. No more just observing cases, but actually doing.  Our research interests lie in surgical database creation and outcome management. The fellow

	<p>will be able to design and perform clinical trials, both industry sponsored, pharmaceutical and device trials.</p> <p>He will be given the opportunity to see how a real men’s clinic is run, offering not just ED treatments but also BPH, hormonal and targeted prostate cancer therapies. We will teach strategic marketing techniques, which will help develop any academic or private practice career. See how 2 of the top Urologists in the country have done it.</p> <p>We are currently performing in office: Rezume, Urolift, Microwave, Targeted MRI guided cryotherapy, 3-D MRI prostate biopsies, cysto, stents, Urgent PC and many more.</p> <p>Fellows will be able to get experience in both BSCI-AMS implants and Coloplast. Since we do not have a residency program he will not have to compete with residents over any cases. The fellow will also have the opportunity to work independently which will uniquely prepare them for practice.</p> <p>Don’t miss your opportunity to learn from Drs. Perito and Gheiler.</p> <p>A Fellowship at Urology Specialists/PeritoUrology is a one-year opportunity to work and study within the realm of Andrology/Sexual Medicine with a focus on prosthetic urology and sex friendly BPH/CAP targeted therapies. Through two of the largest implant centers in the world, fellows will gain experience in both BSCI-AMS and Coloplast prosthetics and utilizing varying approaches.</p> <p>The applicants must be PGY-7, board eligible urologists with a history of interest in Sexual Medicine.</p> <p>Approximately 85% of the Fellows’ time will be dedicated to the clinical setting (Surgery and Clinic) participating in all cases while accruing, with consent, materials for data-base creation and outcome management. The remaining time will be focused on processing these data for presentation at local, state, national and/or international meetings with an expectation of later publication on worthy topics.</p>
<b>Research Focus (300 words)</b>	Developing computer models and Apps for patient outcome reporting

<b>Surgical Procedures Performed</b>	<ul style="list-style-type: none"> <li>x Crural ligation</li> <li>x Penile fracture repair</li> <li>x Plaque incision/excision and grafting</li> <li>x Penile implant</li> <li><input type="checkbox"/> Penile revascularization</li> <li>x Penile plication</li> <li>x Priapism shunting</li> <li><input type="checkbox"/> Vulvar surgery</li>   <li>x Percutaneous sperm extraction</li> <li>x TESE</li> <li>x Varicocele ligation</li> <li><input type="checkbox"/> Electroejaculation</li> <li>x Vasectomy</li> <li>x Vasovasostomy</li> <li><input type="checkbox"/> Vasoepididymostomy</li>   <li>AUS sphincters, slings, Rezume, Greenlight laser, TURP and many more</li> </ul>
<b>Office Procedures Performed</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Cavernosometry/cavernosography</li> <li>x Duplex Doppler Ultrasound</li> <li>x Intracavernosal injections</li> <li>x Intralesional injections</li> <li>x Penile deformity assessment</li> <li>x Testosterone pellet insertion</li>   <li>Urodynamics, Urocuff, MRI Guided 3-D biopsies Cystoscopy- 4 digital scopes</li> </ul>
